

The European e-ID Interoperability Conferenc

*“Current Perspective and Initiatives from around Europe
in Government and Business”*

16/17th March 2010, La Hulpe, Belgium

Hosted by

Innotribe 
ENABLING COLLABORATIVE INNOVATION

Supported by

The planning is well underway for **The European e-ID Interoperability Conference**. Now in its 5th year, this annual conference acts as a neutral forum where industry, business and administrations can address specific areas of importance in the digital identity arena. It also facilitates the exchange of ideas amongst delegates who want to learn and build upon their knowledge in a relaxed, constructive environment. As one of the pioneers of e-ID cards in Europe, Belgium is again the ideal venue for the European e-ID Interoperability Conference.

The conference will explore how the interoperability of European electronic identity (e-ID) is evolving in practise and the implications for governments, businesses and the citizen today. It will focus on key subject areas, you will also gain valuable feedback and alternative opinions and solutions from your industry peers.

It will focus on key subject areas such as those listed below:

- Examples of how business are making use of external e-IDs such as National schemes
- Case studies of interoperability activities between enterprises (examples from the finance sector)
- Discovering the key legal, data protection and privacy implications of interoperating
- Technical issues and solutions (additionally the future use of RFID & NFC applications)
- Latest strategies for maximising the security of e-ID in an open environment
- Specific cross border interoperability challenges and their possible solutions
- Multi-channel utilisation – can this approach extend e-ID beyond current usage using non-conventional carriers and media?
- What Federation technologies and models are deploying now and which standards are dominating?
- Mobile solutions and applications
- Focus on EU initiatives such as STORK – PEPPOL – epSOS – Spocs – ELSA

Over 25 million smartcards for citizens are currently in use in Belgium, providing secure access and authentication for over 250 public and private services – from online income tax returns, to health services, to securing chat room use for teenagers.

e-Services interoperability solution across all European nations is crucial; however there are obstacles which include: relatively centralized and often proprietary architectures; fragmented responsibilities and difficult collaboration, nationally developed digital modernisation programs and a wide range of ID and exchange security methods.

The conference typically attracts 150 attendees from business, public sector and government from countries throughout Europe and also further a field. In 2009 participating organisations came from 17 countries, including 30% from Government/public sector, 20% from user organisations included Motorola, Total, KPMG, Siemens, Visa International, European Commission, Euroclear Bank and the UK HM Revenue and Customs.

We hope you will join in the debate on European e-ID implementations.

Programme
Annual European e-ID Card Conference
Day One: Tuesday 16th March 2010

Speakers Confirmed in Blue

Invited in Red

10.00	Introduction by Session Chair	Roger Dean, Executive Director, EEMA
10.10	Welcome & Introduction to SWIFT	Kosta Peric, Head of Innovation, SWIFT
10.35	Current perspective and some of the challenges facing e-ID interoperability.	Frank Leyman, Manager International Relations, Fedict
11.00	Latest European Union initiatives to facilitate the provision of cross border public services – a European Large Scale bridging action on eIDM	Dr Aniyar Varghese DG INFSO, eGovernment European Commission
11.25	Integrating eID in existing Electronic Authentication and Authorization Systems: Privacy versus Interoperability? This session will discuss the key legal, data protection and privacy implications and challenges caused by inter-organizational inter-operability requirements in the context of changes to eID based authentication.	Franco Arcieri, Nestor - University of Rome "Tor Vergata"
11.50	Specific Cross Border Interoperability Challenges and their Possible solutions	Sylvie Lacroix, Sealed
12.15	Lunch	
13.30	Introduction by Session Chair	Prof. Dr. Reinhard Posch Chief Information Officer des Bundes, Austria
13.40	Interoperability of eIDs from a Public/private Perspective	Martin Kuppinger, Kuppinger Cole
14.05	Bringing Danish Banking and Public Sector to use a Common e-ID Solution: A DanID Case Study	Johnny Bennedsen, CEO DanID
14.30	Panel and Discussion:- Large Scale Pilot (LSP) interoperability and their sustainability – where do we go from here? This panel will look beyond the successful outcome of these LSPs and identify what additional requirements may be needed. to achieve the goal of a single, seamless Pan-European market,	The panel is made up of representatives from STORK – PEPPOL – epSOS – SPOCS Dinand Tinholt, CAPGEMINI , SPOCS Programme Director
16.00	Coffee	
16.30	The eID card; a silver bullet solution for ebanking applications?	Eric Gabrys, VASCO
16.55	SWIFT's experiences with digital identity - theory vs practice	Jacques Hagelstein, Chief Architect, SWIFT
17.20	A vision of identity in 2020	Kim Cameron, Microsoft
17.45	Audience discussion	
18.00 – drinks reception		

Day Two: Wednesday 17th March 2010

	Title	Speaker
09.00	Welcome & introduction by Chairman	
	<u>Parallel Round table discussions</u> These round tables will consist of a Chair, and several panel members who will each take 10 minutes to introduce the session and give their thoughts and opinions, it will then be thrown open to the attendees to continue the discussion, the Chair will be responsible for keeping the subject on track.	
09.30	Round Table 1 - Federated Identity for a Financial Service Appstore	SWIFT Innotribe Lab
	Round Table 2 – International Federated Identity in Education: <ul style="list-style-type: none"> Policies and Standards Applications and Technologies 	Chair - Licia Florio, TERENA, Project Development Officer Andrew Cormack, Chief Regulatory Adviser, JANET(UK) David Simonsen, WAYF.DK
10.45	Coffee	
11.15	Round Table 3 – Getting to grips with mobile eID solutions and their role in Multi-channel utilisation	Chaired by Jon Shamah, BBS RIM – Marcus Klische
	Round Table 4 – Standards & Enforcement – the Catalyst for Interoperability in Europe – what are the front runners – where do SOA and SAML 2.0 fit into the matrix?	Phil D'Angio, VeriSign Business Development Dr Milan Marković, Mathematical Institute SANU Belgrade
12.30	Round Table 5 – Open Identity - where traditional smartcard e-ID and OpenID will meet?	Kick Willemse, Google, Microsoft
	Round Table 6 – eID 2010 – Case Studies and Lessons Learnt Integrating eID within enterprise applications	Peter Valkenburg, CEO, Everet Frank Cornelis, Fedict Markus Wichmann, Siemens
13.45	Lunch	
14.30	Closing Plenary	Chair
15.00	5 minute reports of the Round Table sessions	Round table chairs
15.30	eMe & eBiz: The Virtual Interactive Vault	Peter Hinssen, Across Technology
16.00	Close
