

Dear all,

SpruceID would like to invite you to participate in the upcoming asynchronous mobile driver's license (mDL) Interoperability Event at the end of August, in collaboration with AAMVA and members of ISO/IEC JTC1/SC17 WG10 and WG4. This event will provide a forum over the course of two weeks for implementers of the draft technical specification of ISO/IEC 18013-7 for unattended or fully online presentation of mobile driver's licenses.

The objective of this interoperability event is to drive forward cross-industry interoperability and adoption, while accelerating feedback and clarity for implementations of the standard.

Registration - Open Now:

If you are interested in participating in the event, we encourage you to register through our webpage [linked here](#). Registration will close on August 7 at 23:59 UTC.

Event Details, Timelines, and Test Scope:

You can find more specific event details for the ISO/IEC 18013-7 Interoperability Event on [the event webpage](#), along with the guidelines and technical scope for testing.

Informational Session - July 14:

The SpruceID team will hold an open informational session on Friday, July 14 at 14:00 UTC where we will cover more information about the event and testing guidelines, and allow for Q&A from interested participants. The session will be recorded and stored on our webpage for those who are unable to attend. You can register for the informational session [here](#).

We look forward to accelerating adoption of ISO/IEC 18013-7 with all of you!

Best,

--

Oliver Terbu
